## ACTIVATING VISION – MIDDLE SCHOOL TEACHERS

Teachers,

For those of you that use Vision in the labs to monitor students please note; I have recently updated Vision in all of the computer labs. With this update, you will need to activate the Vision program for you to see the computer lab when logged into the computer. If you do not do this, the lab will not connect when you try to “connect classroom”.

If you cannot remember how to activate the program, I have created a tutorial through Jing on how to do this. Please click on this link to see the tutorial. Make sure your computer's volume is on when watching this video.

<http://screencast.com/t/MGNiMjE3OWMt>

If you have problems viewing, this video please let me know. If you have a use for Jing and would like help setting it up or using it please feel free to contact me.
